CLEANVENT

MAGVENT

You actually save money by installing the Easy Treat® with Quick Sticks®

- Labour cost is lower to apply the chemicals to the Easy Treat
- Labour cost is lower for the installation of the Easy Treat
- Materials are cheaper to install the Easy Treat
- The Quick Sticks are cheaper than the liquid chemicals

Example A) If the HVAC contractor decides to apply the chemicals..

A small to medium sized HVAC installation of 3,000 litres in volume

- Liquid chemical required at 1% dosage equals 30 litres of inhibitor. Weight approx. 35 kilos

Compared against

- 6 Quick Sticks. Total weight 2.7 kilos

Old type dosing pot – Liquid Chemicals

1. Labour cost for the installation for the old type dosing pot (10 litres) and pipework of £150.00.
(Based on three hours)
2. Cost of old type dosing pot (10 litre) £200.00
3. Cost of materials, pipe & fittings £ 85.00
4. Cost and application of 30 litres liquid chemicals (Molybdate) £901.00
(The old type dosing pot has to be filled with liquid chemicals & drained three times, plus circulation time for each dose...)

Total Cost £1366.00

Solid system – Easy Treat ® and Quick Sticks®

5. Labour cost for the installation of £50.00 for the new **Easy Treat ®** and pipework.
(Based on one hour)
6. New Easy Treat dosing pot cost £343.00
7. Cost of materials, pipe & fittings £35.00
8. Adding the Quick Sticks based on a new Easy Treat ® dosing pot labour cost £50.00
(One dose needed only)
9. Cost of Quick Sticks® Chemicals £560.00

Total Cost £ 1038.00

Saving of at least £ 328.00 per Easy Treat® installation.

Example B) HVAC contractor orders the specialist water Treatment Company to apply the chemicals

A small to medium sized installation of 3,000 litres in volume

- Liquid chemical required at 1% dosage equals 30 litres of inhibitor. Weight approx. 35 kilos

Compared against

- 6 Quick Sticks. Total weight 2.7 kilos

Old type dosing pot – Liquid Chemicals

10. Labour cost for the installation for the old type dosing pot (10 litres) and pipework of £150.00.
(Based on three hours)
11. Cost of old type dosing pot (10 litre) £200.00
12. Cost of materials, pipe & fittings £ 85.00
13. Cost and application of 30 litres liquid chemicals (Molybdate) £901.00
(The old type dosing pot has to be filled with liquid chemicals & drained three times, plus circulation time for each dose...)

Total Cost £1336.00

Solid system – Easy Treat® and Quick Sticks®

14. Labour cost for the installation of £50.00 for the new Easy Treat and pipework.
15. New Easy Treat cost £343.00
16. Cost of materials, pipe fittings £35.00
17. Cost of Specialist water treatment company to supply 6 Quick Sticks & apply the chemicals £722.00

Total Cost £ 1150.00

Saving of at least £186.00 per single Easy Treat® installation

The full installation of the Easy Treat® dosing pots & Quick Sticks® Inhibitors are far cheaper than the old dosing pots and liquid chemicals, with average savings of approximately 20%

- Simple, Effective and Environmentally Responsible Water Treatment
- Efficient, and very cost effective
- Reduce hazards and risks / liabilities
- More environmentally responsible
